Forecast for Monday 03 Apr 2023

Weather: After a cold and frosty start it will be dry with plenty of sunshine throughout the day. Despite the sunshine it will feel chilly on the summits due to the wind. Staying dry, clear and cold after dark, with winds easing.

Chance of cloud-free hill tops above 800m: Greater than 90% throughout.

Low Cloud and visibility: Very good visibility throughout, with excellent views of distant hills. Any cloud bases will be above the summits.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Despite the sunshine it will feel rather cold on the summits due to the strength of the wind and the added wind chill. Therefore, extra layers would be advisable for spending any length of time walking or hiking on the peaks. UV levels will be moderate in the prolonged sunshine, especially during the afternoon so some additional sun protection may be required.

Forecast for Tuesday 04 Apr 2023

Weather: Dry with clear skies overnight, leading a fairly widespread frost. After a chilly start, it will be fine and dry, with plenty of sunshine. However, it will begin to turn increasingly cloudy from the west by the evening, mainly mid to high-level cloud.

Maximum wind: South-easterly 15-20mph, gusting up to 25mph at first. Becoming south south-westerly and easing 10-15mph late in the day.

Chance of cloud-free hill tops above 800m: 100% throughout.

Low Cloud and visibility: Very good visibility throughout, with excellent views of distant hills. Any cloud bases will be above the summits, despite increasing later in the day.

Temperature: **Valleys:** Plus 2 Celsius, becoming Plus 10 Celsius.
At 800m: Minus 1 Celsius, becoming Plus 3 Celsius.
Freezing level: Down to 800m at first, then rising above the summits.
